Education

University Of Waterloo Sep 2024 – Apr 2029
Bachelor of Applied Science (BASc) in Computer Engineering *Waterloo, Ontario*

- University of Waterloo President's Scholarship of Distinction

Experience

Technical Program Manager Intern Apr 2026 – Aug 2026
UAT, Regression Testing, Deployment Coordination *Philip Morris International*

- Led integration of an AI translation layer across 13 digital and e-commerce publication platforms
- Coordinated 4+ cross-functional teams and external vendors through deployment planning and go-live
- Defined acceptance criteria, ran UAT sign-off, and tracked regressions to closure
- Won PMI DNA award for AI domain work across Latin America and Canada, first intern to receive it

Full Stack Developer Sep 2025 – Dec 2025
React, MongoDB, REST APIs, CI/CD, Vercel *The Fertility and Reproductive Medicine Centre*

- Built HormoneFit and MDNow, two clinical booking platforms, from scratch on a 3-person team
- Developed appointment booking with email verification and payment processing end to end
- Built role-based admin, doctor, and patient dashboards covering medications, appointments, and records
- Designed React frontend, backend services, and MongoDB data models across both platforms

AI Research & Strategy Consultant Feb 2025 – Apr 2025
Ollama, FastAPI, Prompt Engineering *Searchless Inc.*

- Built and tested an LLM-based tool for generating interview outputs from job descriptions
- Improved output quality through iterative prompt design and testing

Technical Skills

Programming Languages: Python, C++, C, JavaScript, TypeScript, SQL, Java, Bash
Frontend: React, HTML/CSS, D3.js, Responsive UI Design
Backend & AI: FastAPI, Node.js, MongoDB, REST APIs, PyTorch, Hugging Face, Ollama, LLMs, Prompt Engineering
Cloud & Data: AWS, Azure, Snowflake, CI/CD, Power BI, Data Modelling
Practices: Git, Agile, Unit & Regression Testing, Technical Documentation

Projects

Summus - AI T&C Summarizer | *JavaScript, Python, Ollama, FastAPI, Flask-CORS, REST*

- Built a Chrome extension that summarizes terms and conditions pages on demand
- Designed an interactive side panel with chatbot and tab navigation for in-page summaries
- Integrated Ollama Llama 3 and Hugging Face Transformers for summarization and chat

Population Growth Simulator | *JavaScript, D3.js, HTML, CSS*

- Processed Canadian census datasets to model population growth across cities and provinces
- Built interactive D3.js visualizations of regional demographic trends
- Developed dynamic scaling and animation across all 13 provinces and territories

Binary Image Classifier | *PyTorch, ResNet-18, Transfer Learning, Python*

- Fine-tuned a pre-trained ResNet-18 CNN for dog vs. cat classification using transfer learning
- Built an end-to-end training pipeline with image preprocessing, GPU acceleration, and batch loading
- Implemented validation, checkpoint saving, and evaluation on held-out data, 98% validation accuracy

IQ vs Income (Global Data Analysis) | *Python, Pandas, Statistical Analysis, Data Visualization*

- Cleaned and analyzed global demographic and economic datasets
- Performed EDA using regression models, confidence intervals, and outlier detection
- Generated correlation analyses to identify trends and inconsistencies across countries
